

In the Name of Security

The National
Lawyers Guild
Delegation to
the West Bank

An important new documentary about Israel's April 2002 invasion of Palestinian towns, cities & refugee camps.

In May of 2002, a delegation from the National Lawyers Guild traveled throughout the West Bank to investigate allegations of war crimes by the Israeli military. What the delegation found was a state-sponsored campaign aimed at destroying the identity and culture of the Palestinian people. This 27-minute video documents what they saw. Through interviews with Israelis and Palestinians and documentation of destroyed cities and impassable checkpoints, the video describes a brutal occupation designed to prevent statehood and tells the story of the strength of the Palestinian people.
